

EBISA DUGO

Senior Full Stack Developer | Python · FastAPI · Next.js · AI Systems
ebisadugo@gmail.com | linkedin.com/in/ebisa-dugo | github.com/ead8 | ebida-dugo.vercel.app

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 5+ years designing and shipping scalable backend systems, AI-powered platforms, and large-scale automation pipelines. Specialized in Python (FastAPI, Django) and modern TypeScript/Next.js with hands-on expertise building production Retrieval-Augmented Generation (RAG) systems, LLM agents, and resilient web data infrastructure. Delivered 10+ products for international clients across SaaS, real estate, and AI; improved backend API performance by up to 40% and scraping throughput by 60%.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

AI & LLM: LangChain, OpenAI API, RAG Pipelines, AI Agents, Prompt Engineering, Vector Databases (Pinecone, Chroma), LLM Evaluation

Backend: FastAPI, Django, Flask, Node.js, Express.js, REST APIs, GraphQL, Microservices

Frontend: Next.js, React, TypeScript, TailwindCSS, Redux

Data Engineering: Pandas, ETL Pipelines, Async Processing, Apache Airflow, Celery

Web Scraping: Playwright, Selenium, BeautifulSoup, Scrapy, Proxy Rotation, Anti-Bot Bypass

Databases: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, CI/CD, GitHub Actions, Linux, Nginx

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer — Freelance / Self-Employed

Remote · Global Clients (US, EU, APAC) · Jan 2025 – Present

- Architect and deliver scalable backend systems with FastAPI and Django for SaaS products and automation platforms serving international clients.
- Design real-estate intelligence pipelines combining multi-source property data with parcel matching algorithms, processing records at national scale.
- Develop resilient large-scale scraping infrastructure for dynamic, JavaScript-heavy platforms, achieving high reliability against anti-bot protections.
- Implement AI-powered automation workflows using LangChain and LLM APIs for intelligent document processing, classification, and decision support.
- Build asynchronous ETL pipelines processing millions of records using Python, Pandas, and Celery.
- Containerize and deploy production services using Docker and AWS infrastructure (EC2, S3, RDS, Lambda).

Tech: Python, FastAPI, Django, Next.js, TypeScript, LangChain, PostgreSQL, AWS, Docker

AI Systems Evaluator / LLM Engineer (Contract)

Outlier AI · Remote · Jul 2025 – Dec 2025

- Evaluated and improved reasoning, coding, and document understanding capabilities of frontier large language models.
- Designed prompts and reference solutions for complex programming and technical reasoning tasks across multiple domains.
- Reviewed AI-generated Python and TypeScript code for correctness, performance, and architectural quality.
- Contributed to dataset creation and evaluation workflows used to train and benchmark next-generation LLM systems.

AI Training & Software Engineering Contributor (Contract)

Turing · Remote · Jul 2024 – Jun 2025

- Contributed to AI training and evaluation projects focused on improving coding and reasoning capabilities of LLMs.

- Built and reviewed programming tasks involving Python, REST APIs, and complex system design problems.
- Analyzed AI-generated solutions and provided corrections to improve logical reasoning and code accuracy.
- Participated in structured evaluations of LLM outputs covering debugging, algorithm design, and architecture.

Full Stack Developer (Django & Next.js)

Snoozebuzz · Remote · Feb 2023 – Oct 2024

- Developed scalable backend services for an AI productivity and automation platform serving thousands of users.
- Built modern Next.js frontend features improving page load performance and overall user experience.
- Integrated AI chatbot workflows and intelligent API services using OpenAI and LangChain.
- Optimized backend API architecture, improving system reliability and reducing average response times by 40%.

Tech: Django, Next.js, TypeScript, OpenAI, LangChain, PostgreSQL, Redis

Full Stack Developer

Stellar POS · Remote · Mar 2022 – Feb 2023

- Developed a full retail Point-of-Sale platform with inventory, analytics, and reporting modules supporting multi-tenant operations.
- Implemented RESTful APIs and database optimizations improving query performance and overall throughput by 35%+.
- Designed scalable backend architecture using Node.js, Express.js, and PostgreSQL, reducing average API response time across core endpoints.

Tech: Node.js, Express.js, PostgreSQL, React, REST APIs

Software Engineer

Minab · Jun 2020 – Dec 2021

- Built backend APIs and internal automation tools using Python, Django, and Flask, reducing manual workflows by 50%+.
- Contributed to deployment pipelines using Docker and CI/CD workflows, shortening release cycles for the product team.
- Assisted in designing scalable backend infrastructure for early-stage product development.

Tech: Python, Django, Flask, Docker, PostgreSQL

SELECTED PROJECTS

Crypto Intelligence Alert System — AI-Powered Market Monitoring (2025)

- Built automated system monitoring cryptocurrency markets every 15 minutes with real-time anomaly detection.
- Integrated social media sentiment analysis and AI reasoning to explain unusual price movements.
- Delivered real-time Telegram alerts for unusual market momentum to active subscribers.

Tech: Python, FastAPI, OpenAI, PostgreSQL, Redis, Telegram API

Data Harvester Pro — Large-Scale Web Data Collection Platform (2024)

- Built distributed scraping platform using Playwright and Python workers.
- Designed modular architecture enabling scalable data collection from multiple dynamic sources.
- Implemented async task queues, increasing scraping throughput by 60%.

Tech: Python, Playwright, Celery, PostgreSQL, Redis, Docker

NexusAI Agent Orchestrator — Multi-Agent AI Automation Platform (2024)

- Built LangChain-based agent system capable of autonomous multi-step task execution.
- Designed RAG pipelines integrating vector search and knowledge retrieval over private documents.
- Developed FastAPI backend enabling modular AI workflow orchestration and tool calling.

Tech: Python, FastAPI, LangChain, OpenAI, Pinecone, PostgreSQL

Property Intelligence Engine — Real Estate Data Analytics Platform (2023)

- Developed system analyzing property datasets and adjacent parcel relationships at national scale.
- Built automated valuation pipelines integrating multiple public and proprietary data sources.
- Enabled large-scale data processing for property investment insights and market analysis.

Tech: Python, Pandas, PostgreSQL, ETL, AWS

KEY ACHIEVEMENTS

- Delivered 10+ products for international clients across SaaS, real-estate, and AI verticals.
- Designed scalable AI automation systems used in production data analysis workflows.
- Built high-reliability scraping infrastructure handling dynamic, anti-bot-protected web platforms.
- Improved backend API performance by up to 40% in production systems through optimization and caching strategies.

EDUCATION

MSc, Information Technology — University of the People · Online · 2023 – 2025

BSc, Computer Science (GPA: 3.6) — Addis Ababa University · Graduated July 2022
